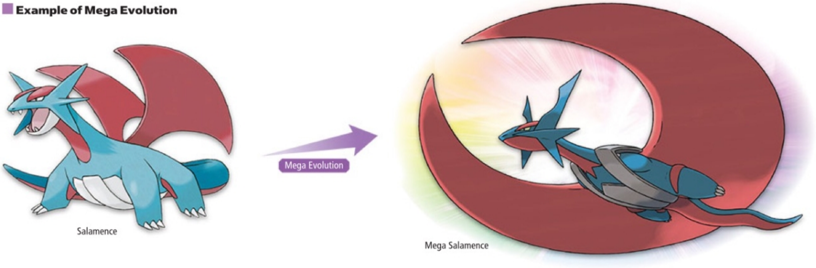
Have Your Pokémon Mega Evolve!

Mega Evolution allows your Pokémon to further evolve during battle, temporarily releasing the powers within them. Pokémon Trainers must hold a Key Stone, and their Pokémon must hold a Mega Stone. There is also Primal Reversion, a transformation in the Hoenn region that only Groudon and Kyogre can trigger.

Example of Mega Evolution



Major features of Mega-Evolved Pokémon

1. When a Pokémon Mega Evolves, there may be changes in its Ability, types, or stats.
2. You can only Mega Evolve one Pokémon on your team during each battle.
3. When the battle ends, your Pokémon will return to its normal state.

Triggering Primal Reversion

1. Have Groudon hold the Red Orb or have Kyogre hold the Blue Orb, and send it into battle. That is all that's necessary to trigger Primal Reversion.

Pokémon's Natures

Each individual Pokémon has a Nature, which affects how its stats grow when it levels up. Most Natures will cause one stat to increase more quickly and one stat to increase more slowly than others. A few Natures, however, provide no benefit and no liability.

Type Matchup Chart

Types are assigned both to moves and to the Pokémon themselves. These types can greatly affect the amount of damage dealt or received in battle, so if you learn how they line up against one another, you'll give yourself an edge in battle.If your Pokémon has two types, the strengths and weaknesses of both types will be used to calculate that Pokémon's weaknesses and strengths. If both types share the same weakness, the Pokémon will take four times the damage.(For example,Grass types and Ice types are both weak to Fire, and each will take 2× damage from a Fire-type move. A Grass- and Ice-type Pokémon will be twice as weak, and take 4× the damage from a Fire-type move.) However, two resistances can combine in the same way. (Fire types and Water types are both resistant to Fire-type attacks,taking only 1/2 the usual damage. A Fire- and Water-type Pokémon would be twice as resistant, and only take 1/4 the usual damage from a Fire-type move.) Finally,a strength and weakness will cancel each other out. (Grass types take 2× damage from Fire-type attacks, and Water types take 1/2 damage from Fire-type attacks. A Grass- and Water-type Pokémon will simply take normal damage from a Fire-type attack, not more or less.)

Ineffective status conditions and moves depending on type

Type	Effect
Fire	· Cannot be afflicted with the Burned condition
Grass	· Immune to Leech Seed · Immune to powder and spore moves
Electric	·Cannot be afflicted with the Paralyzed condition
Ice	· Immune to the Frozen condition · Take no damage from hail
Poison	· Immune to the Poison and Badly Poisoned conditions · Immune to the Poison and Badly Poisoned conditions, when switching in with Toxic Spikes in play · Nullify Toxic Spikes (unless these Pokémon are also Flying type or have the Levitate Ability)
Ground	· Immune to Thunder Wave* · Take no damage from sandstorms
Flying	· Cannot be damaged by Spikes when switching in · Cannot be afflicted with a Poison or Badly Poisoned condition due to switching in with Toxic Spikes in play
Rock	· Take no damage from sandstorms · Sp. Def goes up in a sandstorm
Ghost	· Cannot be affected by moves that prevent Pokémon from fleeing from battle
Steel	· Take no damage from sandstorms · Immune to the Poison and Badly Poisoned conditions · Immune to the Poison and Badly Poisoned conditions, when switching in with Toxic Spikes in play

* Types usually don't have effects on status moves, but Thunder Wave won't work against Ground-type Pokémon.

Inverse Type Matchup Chart

An Inverse Battle is a Pokémon battle in which type matchups will be reversed. For example, a Flying-type Pokémon is immune to Ground-type moves in a normal battle, but in an Inverse Battle, a Ground-type move can inflict twice the damage on a Flying-type Pokémon. You can try Inverse Battles at the Inverse Battle Stop on Mauville City's first floor.

Summary Mega Sceptile's basic fighting stance always positions it with its back toward its opponent. Its tail is also kept aimed at the opponent. It has two sets of spheres along its back, five on the right and five on the left. They are all the same size. With the right move, it can use air pressure to shoot the leafy end of its tail at a target.

Summary Mega Blaziken is easy to spot by the long streamers of flame flowing from its wrists. The flames stream from above and below its wrists and flutter freely. Its feet are hidden by down that covers them, but each foot features three claws just like Blaziken's.

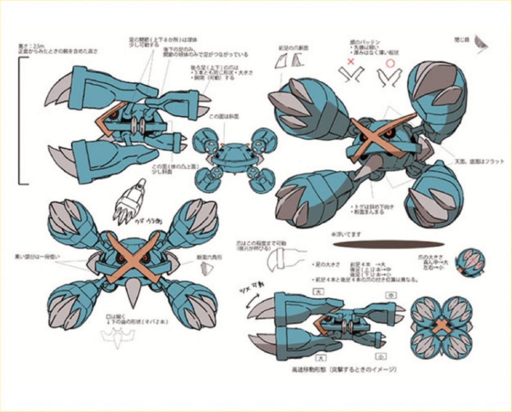
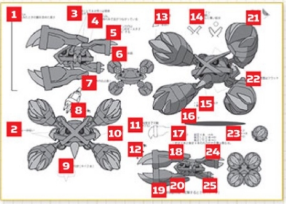
GAME FREAK CONCEPT ART

Mega Metagross





Summary Mega Metagross floats in midair with four arms that thrust imposingly forward. It also has four arms which extend out from its back. When charging a foe, it flattens its arms to make itself aerodynamic enough for high-speed movement.

1 Height: 8'02"
Height when looked at from the front, including arms

2 Black parts are lower in elevation

3 Arm connection joints (eight in total, above and below) are spherical
Has a limited range of motion

4 The lower back arms alone are attached only with ball joints

5 Back legs (upper and lower) claws:
- All three are the same shape and size
- Can be spread apart (can be moved)

6 These faces are slanted

7 This face (where it sticks out from body) has a slight slope

8 Underside of arms

9 Mouth opens
Lower jaw shape (two fangs)

10 Hexagonal in cross section

11 Claws can move about this much (base parts extend)

23 Size of claws:
Middle claw → larger
Right and left claws → smaller

24 Medium

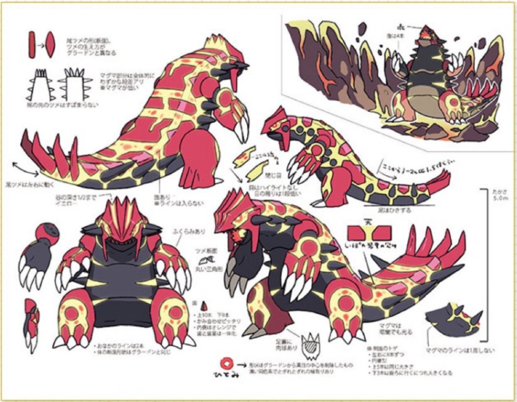
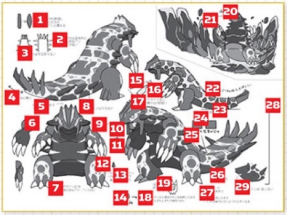
Primal Groudon





Summary Magma flows slightly under the surface of Primal Groudon's body, appearing below the outer layer. The claws on the end of its tail can be spread and moved right and left. It has 10 teeth in its upper jaw and nine in its lower jaw, so that its bite fits together perfectly.

1
- Cross section of shape of claws on tail
- Claws grow in a different way than Groudon's

2 There's a slight difference in height for the magma parts overall
Note: Magma parts are set deeper

3 Claws at tip of tail don't come in together

4 Claws on tail move left and right

5 Lower half of "valleys" are yellow

6 Attachment point

Pikachu Rock Star

2. Matching outfits

Summary Pikachu Rock Star has the same aggressive red color in its jacket, belt, shoes, and the accessories over its eyes, which expresses the fighting spirit that burns within it.
